

Jingjing Du — Infrastructure Engineer

🚀 **Usage:** This version is tailored for **Infrastructure / SRE / Platform Engineering** roles. Strengthens cloud-native, endpoint governance, automation, and observability keywords. Softens pre-sales and commercial language.

🌐 **For international / foreign MNC applications:** All metrics are translated to **business impact (¥ / person-hours / FTE)**, with the international experience spelled out to specific countries.

Summary

Infrastructure engineer with 5+ years owning enterprise IT and endpoint governance at **Decathlon APAC**. Architected a hybrid-cloud POS migration covering **2,000+ terminals across 13 APAC markets** (Japan, Korea, Hong Kong, Taiwan, Australia, NZ, India, Indonesia, Vietnam, Thailand, Malaysia, Philippines, and emerging markets) and built a cloud imaging platform from scratch that now serves 5,000+ endpoints. Works directly with **Decathlon Global HQ (France)** on architecture standards. Deep in Kubernetes, hybrid cloud, and IT automation. **HCIE-Cloud, CKA, CISP, RHCE, CCNP-R&S, PMP** (all globally recognized). I measure myself in uptime, MTTR, and cost per endpoint — not slide count.

Headline Metrics:

Metric	Value
Endpoints governed	2,000+ POS + 5,000+ imaging + 1,000+ MDM
Markets covered	13 APAC (developed + emerging)
System uptime	99.9%
Imaging time	8h → 3.5h / device (1,500+ person-hours saved ≈ ¥225K+)
Imaging success	99.95% (vs industry typical 95%)
Hardware CapEx saved	40% (~¥2M+)
Annual labor savings	Estimated ¥3M+ (imaging + O&M efficiency)

Core Skills

- Containers & Orchestration:** Kubernetes (**CKA** — cluster planning, Helm, on-call troubleshooting), Docker
- Cloud & Architecture:** AWS / GCP / Huawei Cloud / VMware vSphere (hybrid cloud design, cross-cloud image sync, HA)
- Operating Systems:** Red Hat / CentOS (incl. EOL migration), Windows Server (incl. IoT POS edition)
- Automation & IaC:** PowerShell / Shell / Python scripting, Ansible / Puppet / Rundeck
- Endpoint & Mobility:** MDM (Workspace ONE), PXE network imaging, AD domain, device compliance
- Observability & Security:** Zabbix, ServiceNow ITSM, Fortify SCA, WAF, firewall, full log analytics
- Networking:** OSI / TCP/IP architecture (**CCNP-R&S**)

Experience

Decathlon (Shanghai) Sports Co., Ltd. | Infrastructure Engineer (Aug 2022 – Present) · Shanghai

Partners with Decathlon Global HQ (France) and APAC HQ on regional architecture standards

- 1. Spearheaded infrastructure reliability across 300+ APAC stores and 2,000+ endpoints** - Built predictive alerting on top of performance baselines — **99.9% uptime, MTTR cut 40%** - Authored 50+ technical docs, ran 20 internal training sessions, **lifted regional first-line self-recovery from 30% to 75%** (~3 FTE capacity reallocated to strategic work)
- 2. Architected a from-scratch HA cloud imaging system for 5,000+ endpoints** - Built on PXE + cloud storage + Git — **per-device imaging time cut from 2h to 30min (60% efficiency gain)** - Standardized image library and multi-region distribution, **supporting 13-country rapid deployment with an estimated ¥3M+ in annual labor savings**
- 3. Led the end-to-end APAC migration of 2,000+ POS terminals from CentOS 7 to Windows 10 IoT across hybrid cloud (see project section) — zero business disruption**
- 4. Built a mobile device management (MDM) platform from scratch, onboarding 1,000+ mobile endpoints with 98% compliance** - Selected bare-metal + VCenter cluster architecture to meet **China PIPL** data-residency requirements

Shanghai Huaxun Network System Co., Ltd. | Software Delivery Engineer (Apr 2021 – Aug 2022) · Shanghai

- 1. Owned IT infrastructure solution design for 10+ enterprise customers** - Architected the SIPG (Shanghai International Port Group) **ITIL 4 hybrid-cloud O&M platform** covering 2,000+ nodes, integrating Zabbix + Ansible + ServiceNow - Facilitated 12 requirements workshops surfacing 30+ functional points; shipped 5 standardized solution templates covering AWS and asset-management domains
- 2. Owned POC validation and delivery for finance and retail customers** - Closed 5 critical POCs (Pufa Credit Card, Bank of Yinzhou Ningbo, Starbucks AMS) at **100% technical acceptance** - Built Shell/Python automation for deployment and monitoring with **100% on-site incident resolution** - Shipped 15+ platform manuals and training kits
- 3. Architected JD's 2,000+ endpoint desktop-cloud deployment on an HA design**

AsialInfo Technologies (Chengdu) Co., Ltd. | IT System O&M Engineer (Intern → FTE, Jun 2020 – Apr 2021) · Chengdu

- 1. Built the enterprise security program** - Deployed Fortify SCA and related products covering 2,000+ endpoints and 300+ servers; resolved 100+ security incidents - Led the **IAM zero-trust project** to production; contributed to the security posture platform with full log ingestion - Designed ITIL-based Jira incident/change workflows that materially raised process standardization
 - 2. Owned large-scale system migrations end-to-end** - Confluence cross-DC scaling 200 → 2,000 users - Active Directory migration of 2,000+ accounts with zero disruption - Full CDN migration cutting latency 30%
 - 3. Built digital dashboard data APIs** (Python + Spring Boot/Tomcat) to power management dashboards; owned full lifecycle of OKR system and contractor management system (built 0 to 1, see project section)
-

Projects (newest first)

1. Decathlon China Android POS Hardware Innovation (Aug 2025 – Dec 2025) | Project Lead

Background: Replaced the existing Windows POS hardware (high power draw, limited extensibility, unsustainable O&M cost) with a lightweight Android POS platform and a new in-store hardware standard.

Technical highlights: - Evaluated candidates across performance, stability, extensibility, and TCO; **selected an Android host platform aligned with long-term business evolution** - Orchestrated the vendor industrial design team on chassis layout, hardware integration, and peripheral interfacing - Extended the existing MDM with **hardware telemetry, remote diagnostics, and proactive alerting** - Spearheaded the **RFID identification subsystem**: owned reader module selection, frequency tuning, circuit adaptation; ran in-depth tag/sensitivity/anti-interference tests

Result: Finalized and piloted the new-generation Android POS hardware — **40% hardware CapEx reduction (~¥2M+)**, **99.8% RFID identification success rate**, 70% faster bulk-item read throughput, predictive terminal-failure alerting.

2. Decathlon APAC POS Terminal OS Migration (Jan 2024 – Aug 2024) | Project Lead / Architect

Background: Migrated 2,000+ POS terminals from CentOS 7 to Windows 10 IoT across **13 APAC markets (Japan, Korea, Hong Kong, Taiwan, Australia, NZ, India, Indonesia, Vietnam, Thailand, Malaysia, Philippines)** ahead of the CentOS 7 EOL — without a single business disruption.

Technical highlights: - Architected a **hybrid-cloud imaging stack on PXE + cloud storage + Git** with multi-version POS middleware adaptation - Built **fault-tolerant PowerShell automation** integrating POS middleware auto-deploy - Optimized GCP/AWS cross-cloud image sync — **cut per-device imaging time from 8h to 3.5h (56% faster)** - Built automated incident-response workflows on Rundeck — **cut remote-ticket operations 80%** - Shipped a store-level self-service O&M toolkit that **drove ticket volume down 50% in 3 months**

Result: **2,000+ POS terminals migrated with zero business disruption, 99.95% success rate (vs industry typical 95%), 1,500+ person-hours saved (~¥225K+ in engineering cost).**

3. Workspace ONE MDM China Localization (Apr 2023 – Jan 2024) | Technical Lead

Background: Localized the French SaaS Workspace ONE endpoint management platform to comply with **China PIPL**. Led 6 in-house + 5 vendor engineers.

Technical highlights: - Ran SWOT across public cloud vs. on-prem DC; **selected bare-metal + VCenter cluster architecture** - Built Windows/macOS zero-touch migration scripts (PowerShell/Shell) with **99% execution success** in robustness testing - Designed a phased migration strategy to dodge server-load and network-bandwidth bottlenecks - Hardened the platform with firewall + WAF; authored the build manual, O&M runbook, and SLA standards

Result: 100% endpoint migration with zero disruption, built a PIPL-compliant endpoint management system.

4. SIPG IT Unified O&M Management Platform (Nov 2021 – Mar 2022) | Pre-Sales Architect / Business Analyst

Background: Designed an ITIL 4-aligned hybrid-cloud O&M platform for **Shanghai International Port Group (SIPG)**, consolidating fragmented toolchains across 2,000+ nodes.

Technical highlights: - Surveyed 2,000+ nodes and ran 12 requirements workshops, delivering a 30+ functional-point SRS - Architected a unified portal integrating **Zabbix + Ansible + ServiceNow** - Built the POC environment and validated cross-system data interoperability

Result: Closed Phase-1 **¥1M contract**, laid groundwork for Phase-2 ¥3M expansion.

5. AsialInfo Contractor Digital Management Platform (Jun 2020 – Dec 2020) | **Project Lead**

Background: Replaced manual contractor management (200+ headcount, error-prone, no workflow closure) with a digital platform covering the full contractor lifecycle — delivered as a 0-to-1 build.

Technical highlights: - Interviewed regional assistants and HR; mapped 8 core processes (on/offboarding, attendance, payroll); defined 3 modules (employee records, approval workflow, data dashboard) - Built OA-integrated end-to-end approval automation and an employee-profile module for team-structure visualization - Authored the SOP manual and ran 10+ regional training sessions

Result: **On/offboarding processing time cut 96%, HR management time cut 50%, payroll error rate driven to zero**; reusable methodology and platform assets rolled out across AsialInfo regional HR.

Certifications (all globally recognized)

- **HCIE-Cloud Computing** — Huawei
 - **CKA** — CNCF / Linux Foundation
 - **CISP** — China Information Technology Security Evaluation Center
 - **HCIP-Security** — Huawei
 - **PMP** — PMI
 - **RHCE** — Red Hat
 - **CCNP-R&S** — Cisco
-

Education

Shanghai Lixin University of Accounting and Finance · B.Sc. in Computer Science & Technology (IT & Finance Applications) · Sep 2016 – Jun 2020

Core courses: OOP, Operating Systems, Database Principles, Computer Networks, Software Engineering

Languages

- **Chinese:** Native
- **English:** Professional working proficiency (CET-6) — **daily working language for collaboration with Decathlon Global HQ (France) and 13-country APAC vendors / stakeholders**
