

Jingjing Du — Project Manager

- 📌 **Usage:** This version is tailored for **IT Project Manager / Project Delivery / PMO** roles. Strengthens stakeholder management, cross-functional collaboration, requirements and risk control, and PMP/ITIL framework application. Softens pure technical details (script languages, commands, etc.).
- 🌐 **For international / foreign MNC applications:** All metrics are translated to **business impact (¥ / person-hours / FTE)**, with international experience spelled out to specific countries and global HQ collaboration.

Summary

Project manager with 5+ years in IT infrastructure delivery and pre-sales. Led **6+ cross-functional / cross-vendor projects** end-to-end, including 2,000+ terminal cross-cloud migration, MDM localization, and pre-sales contract closure totaling **¥1.3M+**. **PMP-certified**, fluent in ITIL 4 (incident / change / problem / SLA design). **Partners directly with Decathlon Global HQ (France) and 13-country APAC regional teams**, with a strong track record as a credible bridge between technical solutions and business stakeholders. Strong technical foundation (**HCIE-Cloud + CKA + CISP**) so I can weigh in credibly on technical decisions.

Contact: +86 137 6132 3537 | duuujj@126.com

Headline Metrics:

Metric	Value
Projects led	6+ (¥1.3M+ contract closure)
Team size	6 in-house + 5 vendor (steady state)
Markets	13 APAC (incl. JP / KR / HK / TW / AU / NZ + SEA)
Imaging time	8h → 3.5h / device (1,500+ person-hours saved)
Imaging success	99.95% (vs industry typical 95%)
Hardware CapEx saved	40% (~¥2M+)
Cross-time-zone collab	Direct with Decathlon Global HQ (France)

Core Capabilities

- Project Management Methodology:** PMP (9 knowledge areas: scope / schedule / cost / quality / risk / comms / stakeholder / resource / procurement), ITIL 4, WBS, milestones, critical path
- Requirements & Solutions:** Customer research, SRS authoring, prototype design (Axure / Modao), technical solution review, executive stakeholder engagement
- Cross-functional Leadership:** 6 in-house + 5 vendor team management, 13-country APAC coordination, **cross-time-zone async collaboration with Global HQ (France)**
- Pre-Sales & Commercial:** Technical defense, POC validation (5 rounds at 100% pass rate), bidding documents, contract negotiation (¥300K+ closed)
- Risk & Change Management:** Phased migration strategy, SLA design, incident response, three-tier risk register, change review workflow
- Stakeholder Management:** Identification / analysis / engagement planning, RACI matrix
- Technical Foundation (PM complementary):** Cloud architecture (**HCIE-Cloud**), containers (**CKA**), InfoSec (**CISP**) — enables professional judgment in technical decisions

Experience

Decathlon (Shanghai) Sports Co., Ltd. | Infrastructure Engineer / Project Lead (Aug 2022 – Present) · Shanghai

Partners with Decathlon Global HQ (France) and APAC HQ on regional architecture and project governance

- 1. Led APAC-wide POS terminal OS migration (see project section) - 13-country cross-regional coordination, zero business disruption, 99.95% success rate, 1,500+ person-hours saved** - Led 6 in-house + regional implementers with **weekly reviews, risk boards, and stage-gate sign-offs**
- 2. Led Workspace ONE MDM China localization (see project section) - 6 in-house + 5 vendor engineers, 100% endpoint migration with zero disruption** - Aligned **Legal, InfoSec, and Infrastructure** stakeholders on a **PIPL-compliant solution and SLA standards**
- 3. Owned infrastructure reliability program for 300+ stores and 2,000+ endpoints** - Built a regional O&M SOP, ran 20 training sessions, shipped 50+ technical documents - **Lifted regional first-line self-recovery from 30% to 75%** (~3 FTE capacity reallocated), cut MTTR 40%
- 4. Championed 5,000+ endpoint cloud imaging rollout** - Coordinated across **Infrastructure, Application, Business, and Regional** functions - Standardized imaging system cut labor cost 50%, enabled 13-country rapid deployment (**estimated ¥3M+ annual savings**)

Shanghai Huaxun Network System Co., Ltd. | Software Delivery Engineer / Pre-Sales (Apr 2021 – Aug 2022) · Shanghai

- 1. Owned pre-sales and solution design for 10+ enterprise customers** - Designed the SIPG (2,000+ nodes) ITIL 4 hybrid-cloud O&M platform, **ran 12 requirements workshops surfacing 30+ functional points** - Built high-fidelity Axure prototypes and UML/data-flow diagrams; **acted as technical interface to client decision-makers**
- 2. Closed pre-sales wins and commercial conversion - Drove the full pre-sales cycle for the McDonald's network monitoring project, closing a ¥300K contract** - Ran 5 POCs (Yinzhou Bank, Shanghai FSA) at **100% technical acceptance** - Authored bid documents and technical planning artifacts
- 3. Led end-to-end delivery for finance and retail customers** - Pufa Credit Card, Starbucks AMS, JD's 2,000+ endpoint desktop cloud — full-lifecycle delivery - Resolved 50+ on-site technical incidents with sustained high CSAT
- 4. Key-account program management: Dun & Bradstreet Data Blocks** - Full-lifecycle requirements management, SRS delivery, prototype design - **Established foundation for Phase-2 expansion**

AsialInfo Technologies (Chengdu) Co., Ltd. | IT System O&M Engineer (Intern → FTE, Jun 2020 – Apr 2021) · Chengdu

- 1. Owned enterprise security program build-out** - Coordinated security controls across 2,000+ endpoints and 300+ servers - Led the **IAM zero-trust project** to production - Designed ITIL-based Jira incident/change workflows that materially raised process standardization - Owned the contractor management system project (see project section)
 - 2. Led a portfolio of 3 concurrent large-scale migrations — zero incidents** - Confluence cross-DC (200 → 2,000 users), Active Directory (2,000+ accounts), full CDN migration (30% latency reduction)
 - 3. Digital dashboard data API project** - Gathered business requirements and defined the KPI system; built the APIs powering management dashboards - Owned full lifecycle of OKR and enterprise cloud drive systems
-

Projects (newest first)

1. Decathlon China Android POS Hardware Innovation (Aug 2025 – Dec 2025) | Project Lead

Background: Replaced the existing Windows POS hardware (high power draw, limited extensibility, unsustainable O&M cost) with a lightweight Android POS platform and a new in-store hardware standard.

Management practice: - **Scope:** Decomposed into 4 work packages (hardware selection / industrial design / O&M / RFID subsystem) with clear milestones and stage-gate deliverables - **Stakeholder mgmt:** Coordinated local suppliers, business, and regional implementation teams; ran **weekly reviews and joint design reviews** - **Risk mgmt:** Built a **three-tier risk register** for business continuity, hardware supply, and compliance; **100% closure on critical risks** - **Change mgmt:** Drove business adoption from Windows to Android terminals

Result: Finalized and piloted the new-generation Android POS hardware — **40% hardware CapEx reduction (~¥2M+)**, **99.8% RFID identification success rate**, 70% faster bulk-item read throughput, **and completed the APAC POS hardware standardization ecosystem.**

2. Decathlon APAC POS Terminal OS Migration (Jan 2024 – Aug 2024) | Project Lead

Background: Migrated 2,000+ POS terminals from CentOS 7 to Windows 10 IoT across 13 APAC markets (Japan, Korea, Hong Kong, Taiwan, Australia, NZ + SEA / South Asia) ahead of the CentOS 7 EOL.

Management practice: - **Scope:** Decomposed into 4 work packages (imaging / cross-cloud sync / automation / O&M) - **Schedule:** Stood up a central dispatch, orchestrated regional concurrency, and **completed 2,000+ terminals within 7 months** - **Risk:** Phased migration strategy avoided business peaks and compliance risk — **zero business disruption** - **Communication:** Coordinated 13-country stakeholders via **weekly reviews, risk boards, and stage-gate sign-offs** - **Quality:** 99.95% success rate, **1,500+ person-hours saved (~¥225K+ in engineering cost)**

3. Workspace ONE MDM China Localization (Apr 2023 – Jan 2024) | Technical Lead

Background: Localized the French SaaS Workspace ONE endpoint management platform to comply with **China PIPL**.

Management practice: - **Team mgmt:** Led 6 in-house + 5 vendor engineers with **clear RACI and weekly delivery cadence** - **Stakeholder mgmt:** Aligned **Legal, InfoSec, and Infrastructure** on PIPL-compliant solution and SLA standards - **Architecture decision:** Ran SWOT across public cloud vs. on-prem DC; selected **bare-metal + VCenter cluster** - **Change mgmt:** Phased migration delivered 100% endpoint transition with zero disruption

4. SIPG IT Unified O&M Management Platform (Nov 2021 – Mar 2022) | Pre-Sales / Business Analyst

Background: Designed an ITIL 4-aligned hybrid-cloud O&M platform for **Shanghai International Port Group (SIPG)**, consolidating fragmented toolchains.

Management practice: - **Requirements:** Ran 12 workshops, surfaced 30+ functional points, delivered the SRS - **Architecture:** Designed a unified portal integrating **Zabbix + Ansible + ServiceNow** - **Commercial:** Led POC validation and 5-round technical defense; resolved client data-security and performance concerns

Result: **Closed Phase-1 ¥1M contract, laid groundwork for Phase-2 ¥3M expansion.**

5. AsialInfo Contractor Digital Management Platform (Jun 2020 – Dec 2020) | Project Lead

Background: Replaced manual contractor management (200+ headcount, error-prone, no workflow closure) with a digital platform covering the full contractor lifecycle — delivered as a 0-to-1 build.

Management practice: - **Requirements:** Interviewed regional assistants and HR; mapped 8 core processes (on/offboarding, attendance, payroll) - **Solution design:** Defined 3 modules (employee records / approval workflow / data dashboard); integrated OA for end-to-end automation - **Change mgmt:** Ran 10+ regional training sessions, stood up a tiered issue-response mechanism - **Delivery:** 96% faster on/offboarding, 50% reduction in HR time, zero payroll errors

Result: End-to-end digitalization of contractor management — **96% faster on/offboarding, 50% reduction in HR time, zero payroll errors**; reusable methodology and platform assets rolled out across AsiaInfo regional HR.

Certifications (all globally recognized)

- **PMP** (PMI) — Project Management core certification
 - **HCIE-Cloud Computing** (Huawei) — Bridges infrastructure decisions
 - **CKA** (CNCf / Linux Foundation) — Drives K8s adoption decisions
 - **CISP** (China) — InfoSec compliance lens
 - **HCIP-Security / RHCE / CCNP-R&S** — Systems / network / security compound background
-

Education

Shanghai Lixin University of Accounting and Finance · B.Sc. in Computer Science & Technology (IT & Finance Applications) · Sep 2016 – Jun 2020

Core courses: OOP, Operating Systems, Database Principles, Computer Networks, Software Engineering

Languages

- **Chinese:** Native
- **English:** Professional working proficiency (CET-6) — **daily working language for collaboration with Decathlon Global HQ (France) and 13-country APAC vendors / stakeholders**
